

ML 2021 Spring HW12 Report

<Psychology> <Tsai-Rung, Lee>
<b08207042>

Public Score

256

The methods I used to pass the strong baselines include:

1. I used a deep Q-learning model and set num-batch as 1800. Also, the epsilon, the minus epsilon and the decay of epsilon are 1.0, 0.01 and 0.995 respectively.

(Your report should be written in English. Do not exceed 100 words describing your methods, but you may add comments to your code to make other students easier to understand.)
